Never Miss Another Customer Call

I build AI voice receptionists and automations for clinics and local businesses. They answer every call, book appointments, and sync with your CRM, 24/7 — so you never lose a lead.

Recent Work

Problems I've Solved

A few examples of what automation looks like in practice

Voice AI

AI Receptionist for a Dental Practice

Problem: The front desk was missing about 60% of incoming calls.

What I built: A voice agent that answers every call, books appointments, and logs each lead in the CRM.

100% Calls answered

Workflow Automation

Data Sync for an E-commerce Store

Problem: Orders and customer data were copied between tools by hand.

What I built: An n8n workflow that moves data between systems automatically.

3 hrs Saved daily

Safi.

AI Chatbot

Support Bot for a SaaS Company

Problem: The team was buried in repetitive support tickets.

What I built: A Groq-powered chatbot trained on their docs that handles common questions around the clock.

80% Support automated

Want to hear it for yourself?

Ask for a short live demo of a voice AI receptionist, tailored to your type of business.

About Me

AI Automation Expert

I help businesses automate repetitive work so they can focus on what matters — growth.

With 150+ automation projects under my belt, I've seen what works and what doesn't. My approach is simple: understand your problem, design the solution, build it right, and make sure it actually gets used.

I specialize in AI automation (chatbots, voice agents), CRM systems (HubSpot, Salesforce), workflow automation (n8n), and modern web development (Next.js).
